Regarding Collaboration and work with Formwelt

Dear Formwelt Team,

We are very impressed with your research and the idea behind the platform Formwelt Online which is to be built Systemic education, a sense of concept formation and globalized learning for all, large and small, are fundamental for people who will be able to explore their creativity in a crisis-functional way in the future and work together on sustainable programs.

We at ISET Foundation are interested in working with Formwelt Online as one of the pilot projects of Formwelt, so that our children, teacher and other students can enjoy the richness of this language system and its wide range of applications, and can educate themselves in a contemporary way and prepare for a future that challenges their versatility.

We would therefore be honored to serve as one of your pilot project partners, and we look forward to learning, teaching, communicating and growing together with children and adults from other countries through the platform.

Best wishes

Sincerely,

Sandeep Kumar Singh, Ph.D.
